

## PROCEDURAL NOTICE

### PLEASE READ CAREFULLY THE FOLLOWING ADVICES AND SIGN

- » The Micropigmentation procedure normally requires a couple of sessions. To obtain the best results, it is required a second appointment. This would be 6 to 8 weeks after the first session.
  - » People with oily skin may require an additional Color Touch-up. Keep in mind that the intensity of the color will be significantly darker and sharper and a few days after the initial procedure the color will be reduced between 30% and 50% after healing.
  - » Although topical Anesthetic is used during the procedure, the sensibility or uncomfortable may still happen. The skin can be red or swollen after the procedure.
- ↳ Please DO NOT DRINK ALCOHOL 24hrs prior to the procedure.**
- » Unless medically necessary, avoid taking blood thinners like fish oil, herbs, Vitamin E, Aspirin (Ibuprofen, Tylenol etc).
  - » Please avoid the following herbs: Black Pepper, any member of the Ginger family, cayenne, cinnamon, garlic, radish and mustard.
  - » Please, do NOT shape your eyebrows before the appointment, UNLESS you do or have done this before with a professional.
  - » Do not get Electrolysis services at least 5 days before the procedure.
  - » Botox, the AHA products, retinoid must be avoided at least 2 weeks before the procedure.
  - » Exfoliate services, like microdermabrasion, should not be done unless 2 weeks prior to the procedure.
  - » Chemical exfoliations and laser must be avoided at least 6 weeks before the procedure.
  - » Clients prone to **labial herpes or blisters** must take an antiviral 3 days prior to the procedure and after.
  - » Hormonal therapy may affect pigmentation or cause sensitivity.
